

| SILTEX | Textile Auxiliaries |
|----------------------|--|
| PRETREATMENT: | |
| 30106 Asilon OL | A very effective detergent, wetting agent and non solvent based stain remover, stable in acid & alkali and hard water. |
| 30349 Wetol APF | An Excellent Alkyl Phenol Free wetting agent and detergent for pretreatment of articles from cotton and cotton blends with synthetic fibers. |
| 30388 Wetol CDA | Souring agent for the pretreatment of articles from cotton and cotton blends with synthetic fibers |
| 30172 Stabilizer | Excellent stabilizing properties, applicable for continuous and discontinuous peroxide bleaching, organic stabilizer. |
| 30250 SKIAN | Excellent sequestering agent for calcium and magnesium ions, supports the deterging effect of surfactants, prevents silicate deposits on machinery parts |
| DYEING: | |
| 30089 Dispersing | Salt of Naphthalene sulphonic acid in powder form, used as a dispersing agent for disperse and vat dyes |
| 30067 Askol A | A very good complexing agent for Ca & Mg. Also acts as a very good after washing agent for reactive dyes in dyeing & printing. |
| 30101Asirol | excellent after washing agent specially for reactive dyes. |
| 30335 Deepcol | Siltex 30335/Color Deepener is specially designed to impart an excellent durable color deepening effect to various kinds of fabrics.. In addition, it provides soft and silky hand feel. |
| 30372 BUFFER S | A buffer solution for pH adjustment of dyebath within the weakly acid range. Low foaming and no demetallizing effect on dyestuff. |
| 30250 SKIAN | Sequestering and dispersing agent for dyeing.No demetallising effect on dyestuffs. |
| | |

SILTEX

Textile Auxiliaries

FINISHING :

| | |
|--------------|---|
| 33101 | Highly active amino functional micro emulsion. It gives a very soft resilience and elegant handle to all types of fabrics. Exhibits excellent shaer stability Durable soft, silky hand & Low yellowing |
| 33001 | Amino functional micro emulsion gives a soft, resilience handle to all type of fabrics.Gives durable soft & silky hand,high luster and Low yellowing. |
| 33127 MEF | special grade of silicone with amino functional properties having the outstanding combined properties of elastomer and micro emulsion.Durable soft, silky hand Improves the rubbing fastness of pigment print |
| 30139 | Silicone Emulsion with Aminofunctional properties as well as good surface finish. |
| 33145 | Siltex 33145 is a new generation Product which is both truly soft and absolutely non – yellowing at normal application time & temperature |
| 30334 | a microemulsion of amino functional silicone. It gives soft silky and luxurious handle to all types of fabrics. |
| 23007 | Siltex 23007 is an elastomeric preparation based on modified polysiloxane. It imparts rich softness, elasticity and recuperation. Improvement in Pilling fastness |
| 11001 | Nonionic polyethylene emulsion. Softener and smoothing component for inclusion in the finishing baths, especially high grade finishing baths. |
| 30203 | Cationic Silicone based product. imparts a soft, smooth and full handle to nearly all kind of fabrics. |
| 30131 PAXIL | It imparts a soft pleasant touch and improves the sewability of knitwear hence preventing needle damage to stitches during ready-to-wear manufacturing |
| ME 303 | Highly active amino functional micro emulsion.It gives a very soft resilience and elegant handle to all types of fabrics and exhibits excellent shaer stability. |
| 30383 Alosil | Siltex 30383 / Alosil is a carefully formulated product for cellulosic and synthetic woven and knitted fabrics to impart soft finish with an Aloe Vera effect. |
| 30262 | It imparts properties of softness and HYDROPHILICITY to naturally hydrophilic fabrics , whilst providing weight to the fabric |
| 30098 Cs | Cationic amine condensation product, gives very good softness but less add on as compared to other cationic softness cold water soluble. |

SILTEX

Textile Auxiliaries

| | |
|-------------------------|---|
| 30173 Asisoft A | It is a non-ionic fatty acid based softener, which can be applied to all fabrics. Imparts full and very soft handle. |
| 30247 Cat-Ionic | An excellent cationic, cold-water rapid soluble softener for Cotton, T/C, knitted and blended fabrics. It has very good hand feeling and antistatic properties. The product is in flakes form. |
| 30248 Non-Ionic | A polyhydric alcohol type nonionic softening agent for natural and synthetic fibers. It imparts a smooth, soft hand with moisture absorbing and moderate anti-static properties. The product is in flakes form. |
| Special Finishes | |
| 30222 Hydrophilic | Hydrophilic silicone micro emulsion. imparting very good hydrophilic properties, soft handle and elastic resilience to all types of fibers. Non yollowing |
| 30298 Hydro Star | It imparts properties of softness and HYDROPHILICITY to both woven fabric and towels. Provide full soft handle and good antistatic effect. |
| 30344 Hydrosoft | A hydrophilic softener. It imparts bulky dry non-oily soft handle to the cotton fabric |
| 30336 OWR | Water –and oil repellent finishing agent for all fibre types. Resistant to washing and dry cleaning |
| 30143 Soil Release | Siltex – 30143 is the ultimate in soil release/comfort finishes for 100% polyester fabric |
| 30200 Resin | A modified glyoxal based DMDHEU for easy care finishes. Provide very low formaldehyde release while retaining good physical properties on fabric |
| 30170 FRP | Durable Flame retardant for woven and knitted polyester material. Does not contain halogens (bromine) |
| 30261 FRC | Provides a flame retardant finish for cellulosic textiles, durable to repeated washing and dry cleaning |
| 30345 Antiflame NDC | Non-Durable type finishing agent for Flame retardant finish on cellulosic fibres |
| 30212 Antibacterial | Antibacterial is effective in killing and preventing the growth of both bacteria and fungi known to degrade textile substrates. The product is Non Phenolic and Formaldehyde Free. |

SILTEX

Textile Auxiliaries

PRINTING:

30101Asirol

Polymeric anionic salt used for preventing back staining in denim wash,dry solubilising agent, excellent after washing agent specially for reactive dyes.

30106 Asilon OL

A very effective detergent, wetting agent and non solvent based stain remover, stable in acid & alkali and hard water.

33127 MEF

Improves the rubbing fastness of pigment print. Provide durable soft and silky hand

GARMENT WASH:

30088 Enzume

A cellulose based enzyme used for bio finishing to cellulosic fabrics and denim wash effect .

30298 Nutrazyme PR

Powder Neutral Cellulose Enzyme for stone wash effect on denim garments.

30399 Ultrazyme UDT

Powder Acid cellulose enzyme for stone wash effect on denim garments.

ME 303

Highly active amino functional micro emulsion, gives an excellent softness to the garments

30168

Micro emulsion based on amino functional silicone, gives a good softness to the garments.

30264 GLW

Cationic silicone based softener for used in garment laundry wash application.

30098 Cs

Cationic amine condensation product, gives very good softness but less add on as compared to other cationic softness cold water soluble

30247 Cationic

An excellent cationic, cold-water rapid soluble softener for Cotton, T/C, knitted and blended fabrics. It has very good hand feeling and antistatic properties.The product is in flakes form.

30106 Asilon OL

A very effective detergent, wetting agent and non solvent based stain remover, stable in acid & alkali and hard water.

30349 Wetol APF

An Excellent Alkyl Phenol Free wetting agent and detergent for garments washing.

30101 Asirol

A good anti back staining agent for denim washing.
